5 1/2 impression of glass "tube" with "filament" inside pulsing w/ light + energy

Inform Summary

Idea ~~is~~ that this "apparatus" is electro magnetic in nature that two types or variations of e.m. fields or forces are brought together to produce a third force - it is this 3^d force that they are trying to obtain + control. There's an idea of "beating" the 2 ~~var~~ fields together, to achieve some sort of "beat frequency".

Documents are many & come in "slide bundles" or "books";
they are "working" documents & are continually being added to.
They are ~~full of~~ drawings - "schematics" - wiring diagrams,
detailed discussion of assembly & construction, as well as
precautionary & safety, concerns - the people working on & ⁶ his
make very sure of each step before going on to the next.
There are ~~numbers~~, tables, ~~turns~~, "latches" lists, ~~with~~
detailed directions for working with & on the apparatus.
Conductivity is very important. If resistance in
the system is too high, effects are degraded to the
point they are useless or non-existent.

Paul Session #4, Project "N" - 3 June 1987

- ① Paul I want you to move into a Stage II Matrix and Stage 5 the coordinates themselves. Can you do that? "Yes. This could be interesting." 523887/688599
- ② "Did it work?" I don't know Paul but in your topics you mentioned Research - I would like you to do a Stage V of Research - "OK"
- ③ -Papers & Documents - Stage 5 The Papers and Documents - You made reference to Document, Documented, papers etc. Let's stage 5 that concept
- ④ "I have an impression of a device with two types of electromagnetic forces being brought together to create another different force -" OK, give me that in an interim Summary and then we will stage 5 the concept of documents/papers -
- ⑤ "I can't do both" OK Paul do Stage V on Documents.
- ⑥ Don't push of Paul (Long delay - 5 hours) - I'm going to re-call because I know there is more here. (Said) Accepted or rejected -
- ⑦ ~~Can you~~ Do you think you can acquire anymore information on the documents? "No" OK please summarize your perceptions and we will terminate the session at this time -
